1. Anaesthesiology

Computer simulations of propofol infusions for total intravenous anaesthesia in dogs — K E Joubert .......................... 2
Sedative and cardiopulmonary effects of acepromazine, midazolam, butorphanol, acepromazine-butorphanol and midazolam-butorphanol on propofol anaesthesia in goats — T B Dzikiti, G F Stegmann, L J Hellebrekers, R E J Auer and L N Dzikiti .......................................................... 10
Cardiovascular effects of lumbar epidural anaesthesia in isoflurane-anaesthetised pigs during surgical removal of the liver — G F Stegmann ................................................................. 37
Effects of lumbosacral epidural ketamine and lidocaine in xylazine-sedated cats — R DeRossi, A P Benites, J Z Ferreira, J M N Neto and L C Hermeto ................................................................. 79
Preliminary assessment of the AAI Index® during isoflurane anaesthesia in dogs undergoing clinical procedures — K E Joubert .......................... 185
Partial intravenous anaesthesia in 5 horses using ketamine, lidocaine, medetomidine and halothane — K Kruger and G F Stegmann ................................................................. 233
A comparison of epidural anaesthesia with lignocaine, bupivacaine and a lignocaine-bupivacaine mixture in cats — F M Lawal and A Adetunji ................................................................. 243

2. Avian (poultry, ostriches and cage birds)

Changes in weight gain, faecal oocyst count and packed cell volume of Eimeria tenella-infected broilers treated with a wild mushroom (Ganoderma lucidum) aqueous extract — A O Ogbe, S E Atawodi, P A Abdu, A Sannusi and A E Itodo .......................... 97
Efficacy of a genotype 2 Newcastle disease vaccine (Avinew®) against challenge with highly virulent genotypes 5d and 3d — D G Bwala, C Abolnik, A van Wyk, E Cornelius and S P R Bisschop .......................... 174
A survey of ectoparasites, cestodes and management of free-range indigenous chickens in rural Zimbabwe — S Mukaratirwa and T Hove .......................... 188

3. Bacterial, mycoplasmal and fungal diseases

Trends in udder health and emerging mastigotic pathogens in South African dairy herds — I-M Petzer, J Karzis, J C Watermeyer, T J van der Schans and R van Reenen ................................................................. 17
Intramammary infection rate during the dry period in cows that received blanket dry cow therapy: efficacy of 6 different dry-cow intra-mammary antimicrobial products — I-M Petzer, D C Lourens, T J van der Schans, J C Watermeyer, R van Reenen, G H Rautenbach and P Thompson ................................................................. 23
A serological survey of leptospirosis in cattle of rural communities in the province of KwaZulu-Natal, South Africa — U W Hesterberg, R Bagnall, B Bosch, K Perrett, R Horner and B Gummow .......................... 45
Cooking and drying as effective mechanisms in limiting the zoonotic effect of Mycobacterium bovis in beef — M van der Merwe, J L Bekker, P van der Merwe and A L Michel .......................... 142
Heartwater: an abridged historical account — J D Bezuidenhout .......................... 208
‘Emerging’ mycobacteria in South Africa — P D van Helden, S D C Parsons and N Gey van Pittius .......................... 210

4. Bovine

Trends in udder health and emerging mastigotic pathogens in South African dairy herds — I-M Petzer, J Karzis, J C Watermeyer, T J van der Schans and R van Reenen ................................................................. 17
Intramammary infection rate during the dry period in cows that received blanket dry cow therapy: efficacy of 6 different dry-cow intra-mammary antimicrobial products — I-M Petzer, D C Lourens, T J van der Schans, J C Watermeyer, R van Reenen, G H Rautenbach and P Thompson ................................................................. 23
A serological survey of leptospirosis in cattle of rural communities in the province of KwaZulu-Natal, South Africa — U W Hesterberg, R Bagnall, B Bosch, K Perrett, R Horner and B Gummow .......................... 45
Inadequate thickness of the weight-bearing surface of claws in ruminants — A S Shakespeare .......................... 247
Construction and insertion of oesophageal cannulae for use in domestic ruminants — D G Booyse, G Harmse and E A Boomker .......................... 270
Evaluation of activated charcoal as treatment for Yellow tulp (Morganella pullida) poisoning in cattle — L D Snyman, R A Schultz, C J Botha, L Labuschagne and J P J Joubert .......................... 274
5. Canine

Computer simulations of propofol infusions for total intravenous anaesthesia in dogs — K E Joubert
Potential plant poisonings in dogs and cats in southern Africa — C J Botha and M-L Penrith
Comparison of Babesia rossi and Babesia canis isolates with emphasis on effects of vaccination with soluble parasite antigens: a review — T P M Schetters, K Moubri and B M Cooke
A retrospective investigation of canine adenovirus (CAV) infection in adult dogs in Turkey — S Gür and A Acar
C-reactive protein in canine babesiosis caused by Babesia rossi and its association with outcome — L S Köster, M van Schoor, A Goddard, P N Thompson, P T Matjila and M Kjelgaard-Hansen
Combination therapy using intratumoral bacillus Calmette-Guerin (BCG) and vincristine in dogs with transmissible venereal tumours: therapeutic efficacy and histological changes — S Mukaratirwa, S Chitanga, T Chimatira, C Makuleke, S T Sayi and E Bhebe
Lymphoma in 5 related Rottweilers from a single household — R G Lobetti
Myotonia congenita in a Jack Russell terrier — R G Lobetti
The effects of firocoxib (Previcox) in geriatric dogs over a period of 90 days — K E Joubert
Preliminary assessment of the AAI Index® during isoflurane anaesthesia in dogs undergoing clinical procedures — K E Joubert
Urinary bladder botryoid rhabdomyosarcoma with widespread metastases in an 8-month-old Labrador cross dog — K Gerber and P Rees
The intravenous pharmacokinetics of diminazene in healthy dogs — V Naidoo, M S G Mulders and G E Swan
A retrospective study of chronic nasal disease in 75 dogs — R G Lobetti
Negative MRI findings in a case of degenerative myelopathy in a dog — M Okada, M Kitagawa, K Kanayama, H Yamamura and T Sakai
Large granular lymphocytic leukaemia complicated with histiocytic sarcoma in a dog — T Maruo, K Namikawa, A Kunihiro, J Lynch, T Shida and S Kishikawa

6. Caprine

Sedative and cardiopulmonary effects of acepromazine, midazolam, butorphanol, acepromazine-butorphanol and midazolam-butorphanol on propofol anaesthesia in goats — T B Dzikiti, G F Stegmann, L J Hellebrekers, R E J Auer and L N Dzikiti
Inadequate thickness of the weight-bearing surface of claws in ruminants — A S Shakespeare
Construction and insertion of oesophageal cannulae for use in domestic ruminants — D G Booyse, G Harmse and E A Boonker

7. Clinical pathology

C-reactive protein in canine babesiosis caused by Babesia rossi and its association with outcome — L S Köster, M van Schoor, A Goddard, P N Thompson, P T Matjila and M Kjelgaard-Hansen

8. Congenital conditions

Myotonia congenita in a Jack Russell terrier — R G Lobetti

9. Economics/production

10. Education

A case-based, small-group cooperative learning course in preclinical veterinary science aimed at bridging basic science and clinical literacy — J P Schoeman, M van Schoor, L L van der Merwe and R A Meintjes

11. Epidemiology

A serological survey of leptospirosis in cattle of rural communities in the province of KwaZulu-Natal, South Africa — U W Hesterberg, R Bagnall, B Bosch, K Perrett, R Horner and B Gummow
The epidemiology of lion lentivirus infection among a population of free-ranging lions (Panthera leo) in the Kruger National Park, South Africa — H Adams, M van Vuuren, A-M Bosman, D Keet, J New and M Kennedy
Annual ryegrass toxicity in Thoroughbred horses in Ceres in the Western Cape Province, South Africa — J D Grewar, J G Allen and A J Guthrie

12. Equine

Nuchal crest avulsion fracture in 2 horses: a cause of headshaking — A Voigt, M N Saulez and C M Donnellan
Annual ryegrass toxicity in Thoroughbred horses in Ceres in the Western Cape Province, South Africa — J D Grewar, J G Allen and A J Guthrie
Partial intravenous anaesthesia in 5 horses using ketamine, lidocaine, medetomidine and halothane — K Kruger and G F Stegmann
Use of Ir\(^{192}\) interstitial brachytherapy for an equine malignant dermal schwannoma — M N Saulez, A Voigt, J C A Steyl, E van Wilpe, J Kotzen, F Daniels ............................................. 264

13. Feline
Potential plant poisonings in dogs and cats in southern Africa — C J Botha and M-L Penrith ......................... 63
Effects of lumbosacral epidural ketamine and lidocaine in xylazine-sedated cats — R DeRossi, A P Benites, J Z Ferreira, J M N Neto and L C Hermeto ......................................................... 79
A comparison of epidural anaesthesia with lignocaine, bupivacaine and a lignocaine-bupivacaine mixture in cats — F M Lawal and A Adetunji .................................................. 243

14. Food hygiene
Residue depletion of colistin in swine after intramuscular administration — S S Tang, L J Gong, J K He, X Jin and X L Xiao ... 41
Cooking and drying as effective mechanisms in limiting the zoonotic effect of \textit{Mycobacterium bovis} in beef — M van der Merwe, J L Bekker, P van der Merwe and A L Michel .................... 142
An investigation of the quality of meat sold in Lesotho — T M Seeiso and C M E McCrindle ........................................ 237

15. History
Heartwater: an abridged historical account — J D Bezuidenhout .......................................................... 208

16. Immunology/vaccination
Comparison of \textit{Babesia rossi} and \textit{Babesia canis} isolates with emphasis on effects of vaccination with soluble parasite antigens: a review — T P M Schetters, K Moubri and B M Cooke ........................................... 75
Efficacy of a genotype 2 Newcastle disease vaccine (Avinew\textsuperscript{TM}) against challenge with highly virulent genotypes 5d and 3d — D G Bwala, C Abolnik, A van Wyk, E Cornelius and S P R Bisschop .................. 174

17. Medicine
Combination therapy using intratumoral bacillus Calmette-Guerin (BCG) and vincristine in dogs with transmissible venereal tumours: therapeutic efficacy and histological changes — S Mukaratirwa, S Chitanga, T Chimatira, C Makuleke, S T Sayi and E Bhebe ........................................... 92
Changes in weight gain, faecal oocyst count and packed cell volume of \textit{Eimeria tenella}-infected broilers treated with a wild mushroom (\textit{Ganoderma lucidum}) aqueous extract — A O Ogbe, S E Atawodi, P A Abdu, A Sannusi and A E Itodo ................. 97
Myotonia congenita in a Jack Russell terrier — R G Lobetti .............................................................. 106
The effects of firocoxib (Previcox\textsuperscript{TM}) in geriatric dogs over a period of 90 days — K E Joubert ................................. 179
A retrospective study of chronic nasal disease in 75 dogs — R G Lobetti .................................................. 224
Inadequate thickness of the weight-bearing surface of claws in ruminants — A S Shakespeare ........................................... 247
Negative MRI findings in a case of degenerative myelopathy in a dog — M Okada, M Kitagawa, K Kanayama, H Yamamura and T Sakai .................................................. 254
Large granular lymphocytic leukaemia complicated with histiocytic sarcoma in a dog — T Maruo, K Namikawa, A Kunihiro, J Lynch, T Shida and S Kishikawa ...................... 261
Use of Ir\(^{192}\) interstitial brachytherapy for an equine malignant dermal schwannoma — M N Saulez, A Voigt, J C A Steyl, E van Wilpe, J Kotzen, F Daniels ........................................ 264
Evaluation of activated charcoal as treatment for Yellow tulp (\textit{Moruca pallida}) poisoning in cattle — L D Smyman, R A Schultz, C J Botha, L Labuschagne and J P J Joubert ..................... 274

18. Neoplasia
Combination therapy using intratumoral bacillus Calmette-Guerin (BCG) and vincristine in dogs with transmissible venereal tumours: therapeutic efficacy and histological changes — S Mukaratirwa, S Chitanga, T Chimatira, C Makuleke, S T Sayi and E Bhebe ........................................... 92
Lymphoma in 3 related Rottweilers from a single household — R G Lobetti .................................................. 103
Periaortic haemangiosarcoma in an African wild dog (\textit{Lycaon pictus}) — A Newell-Fugate and E Lane ......................... 108
Urinary bladder botryoid rhabdomyosarcoma with widespread metastases in an 8-month-old Labrador cross dog — K Gerber and P Rees .................................................... 199
Use of Ir\(^{192}\) interstitial brachytherapy for an equine malignant dermal schwannoma — M N Saulez, A Voigt, J C A Steyl, E van Wilpe, J Kotzen, F Daniels ........................................ 264

19. Ovine
Putative \textit{Aspergillus niger}-induced oxalate nephrosis in sheep — C J Botha, M Truter, T Bredell, L Lange and M S G Mülders .................................................... 50
Inadequate thickness of the weight-bearing surface of claws in ruminants — A S Shakespeare ........................................... 247
Construction and insertion of oesophageal cannulae for use in domestic ruminants — D G Booyse, G Harmse and E A Boomker .................................................... 270
20. Parasitology
Post mortem identification of Kalicephalus colubri colubri (Nematoda: Diaphanocephalidae) in a captive Mole snake (Pseudaspis cana) in South Africa — K Junker, E P Lane, B Dlamini, A Kotze and J Boomker ........................................... 54
Changes in weight gain, faecal oocyst count and packed cell volume of Eimeria tenella-infected broilers treated with a wild mushroom Ganoderma lucidum aqueous extract — A O Ogbe, S E Atawodi, P A Abdu, A Sannusi and A E Itodo .................. 97
A survey of ectoparasites, cestodes and management of free-range indigenous chickens in rural Zimbabwe — S Mukaratirwa and T Hove ........................................... 188
Cysticercosis Working Group for Eastern and Southern Africa – 6th General Assembly — M.L. Penrith ............................. 206
Hepatic capillariasis in a Cape ground squirrel (Xerus inaurus) — K H Erhwanger, B A De Witt, L G Fick, R S Hetem, L C R Meyer, D Mitchell, W A Wilson and B Mitchell ........................................... 276

21. Pathology
Combination therapy using intratumoral bacillus Calmette-Guerin (BCG) and vincristine in dogs with transmissible venereal tumours: therapeutic efficacy and histological changes — S Mukaratirwa, S Chitanga, T Chimatira, C Makuleke, S T Sayi and E Bhebe ........................................... 92
Periarticular haemangiosarcoma in an African wild dog (Lycaon pictus) — A Newell-Fugate and E Lane ....................... 108
Urinary bladder botryoid rhabdomyosarcoma with widespread metastases in an 8-month-old Labrador cross dog — K Gerber and P Rees ........................................... 199
Detection of the bovine viral diarrhoea/mucosal disease (BVD/MD) virus in tissues from aborted ruminant foetuses using immunohistochemistry (IHC) — S M Njio and C M Nkosi ........................................... 229
Large granular lymphocytic leukaemia complicated with histiocytic sarcoma in a dog — T Maruo, K Namikawa, A Kunihiro, J Lynch, T Shida and S Kishikawa ........................................... 261
Use of Ir 192 interstitial brachytherapy for an equine malignant dermal schwannoma — M N Saulez, A Voigt, J C A Steyl, E van Wilpe, J Kotzen, F Daniels ........................................... 264

22. Pharmacology
Residue depletion of colistin in swine after intramuscular administration — S S Tang, L J Gong, J K He, X Jin and X L Xiao. 41
Intramuscular infection rate during the dry period in cows that received blanket dry cow therapy: efficacy of 6 different dry-cow intra-mammary antimicrobial products — I-M Petzer, D C Lourens, T J van der Schans, J C Watermeyer, R van Reenen, G H Rautenbach and P Thompson ........................................... 23
The effects of firocoxib (Previcox) in geriatric dogs over a period of 90 days — K E Joubert ........................................... 179
Combination therapy using intratumoral bacillus Calmette-Guerin (BCG) and vincristine in dogs with transmissible venereal tumours: therapeutic efficacy and histological changes — S Mukaratirwa, S Chitanga, T Chimatira, C Makuleke, S T Sayi and E Bhebe ........................................... 92
The intravenous pharmacokinetic of diminazene in healthy dogs — V Naidoo, M S G Mulders and G E Swan .................. 215
Evaluation of activated charcoal as treatment for Yellow tulp (Moraea pallida) poisoning in cattle — L D Snyman, R A Schultz, C J Botha, L Labuschagne and J P J Joubert ........................................... 274

23. Porcine
Cardiovascular effects of lumbar epidural anaesthesia in isoflurane-anaesthetised pigs during surgical removal of the liver — G F Stegmann. ........................................... 37
Residue depletion of colistin in swine after intramuscular administration — S S Tang, L J Gong, J K He, X Jin and X L Xiao. 41
Review of African swine fever: transmission, spread and control — M-L Penrith and W V osloo ........................................... 58
Cysticercosis Working Group for Eastern and Southern Africa – 6th General Assembly — M-L Penrith ........................................... 206

24. Protozoal diseases
Comparison of Babesia rossi and Babesia canis isolates with emphasis on effects of vaccination with soluble parasite antigens: a review — T P M Schetters, K Moubri and B M Cooke ........................................... 75
C-reactive protein in canine babesiosis caused by Babesia rossi and its association with outcome — L S Köster, M van Schoor, A Goddard, P N Thompson, P T Matjila and M Kjeldgaard-Hansen ........................................... 87
Changes in weight gain, faecal oocyst count and packed cell volume of Eimeria tenella-infected broilers treated with a wild mushroom Ganoderma lucidum aqueous extract — A O Ogbe, S E Atawodi, P A Abdu, A Sannusi and A E Itodo 97
Putative clinical piroplasmosis in a Burchell’s zebra (Equus quagga burchelli) — F Lampen R, Bhoora, N E Collins and B L Penczhorn ........................................... 257

25. Reproduction
Assessment of viability and acrosomal status of Asian elephant (Elephas maximus) sperm after treatment with calcium ionophore and heparin — M Sa-ardrit, N Thongtip, K Kornkaewrat, T Faisaikarm, Y Kitiyanant, S Mahasawangkul, A Pinyopummin and K Saikhun ........................................... 146

26. Surgery
Nuchal crest avulsion fracture in 2 horses: a cause of headshaking — A Voigt, M N Saulez and C M Donnellan ........................................... 111
Construction and insertion of oesophageal cannulae for use in domestic ruminants — D G Booyse, G Harmse and E A Boomker  

27. Toxicology
Putative Aspergillus niger-induced oxolate nephrosis in sheep — C J Botha, M Truter, T Bredell, L Lange and M S G Mulders  
Potential plant poisonings in dogs and cats in southern Africa — C J Botha and M-L Penrith  
Annual ryegrass toxicity in Thoroughbred horses in Ceres in the Western Cape Province, South Africa — J D Grewar, J G Allen and A J Guthrie  
Evaluation of activated charcoal as treatment for Yellow tulp (Moraea pallida) poisoning in cattle — L D Snyman, R A Schultz, C J Botha, L Labuschagne and J P Joubert  

28. Viral diseases
Review of African swine fever: transmission, spread and control — M-L Penrith and W Vosloo  
A retrospective investigation of canine adenovirus (CAV) infection in adult dogs in Turkey — S Gür and A Acar  
The epidemiology of lion lentivirus infection among a population of free-ranging lions (Panthera leo) in the Kruger National Park, South Africa — H Adams, M van Vuuren, A-M Bosman, D Keet, J New and M Kennedy  
Efficacy of a genotype 2 Newcastle disease vaccine (Avinew*) against challenge with highly virulent genotypes 5d and 3d — D G Bwala, C Abolnik, A van Wyk, E Cornelius and S P R Bisschop  
Detection of the bovine viral diarrhoea/mucosal disease (BVD/MD) virus in tissues from aborted ruminant foetuses using immunohistochemistry (IHC) — S M Njiro and C M Nkosi  

29. Wildlife/exotic/laboratory animals
Post mortem identification of Kalicephalus colubri colubri (Nematoda: Diapenachoelaenidae) in a captive Mole snake (Pseudaspis cana) in South Africa — K Junker, E P Lane, B Dlamini, A Kotze and J Boomker  
Periaotic haemangiosarcoma in an African wild dog (Lycaon pictus) — A Newell-Fugate and E Lane  
Assessment of viability and acrosomal status of Asian elephant (Elephas maximus) sperm after treatment with calcium ionophore and heparin — M Sa-ar-dit, N Thongtip, K Komkaewrat, T Faisai-karm, Y Kitiyanant, S Mahasawangkul, A Pin-yopummin and K Saikun  
The epidemiology of lion lentivirus infection among a population of free-ranging lions (Panthera leo) in the Kruger National Park, South Africa — H Adams, M van Vuuren, A-M Bosman, D Keet, J New and M Kennedy  
Putative clinical piroplasmosis in a Burchell’s zebra (Equus quagga burchelli) — F Lampen R, Bhoora, N E Collins and B L Penzhorn  
Hepatic capillariasis in a Cape ground squirrel (Xerus inaurus) — K H Erlwanger, B A De Witt, L G Fick, R S Hetem, L C R Meyer, D Mitchell, W A Wilson and B Mitchell  

30. Zoonosis
Cooking and drying as effective mechanisms in limiting the zoonotic effect of Mycobacterium bovis in beef — M van der Merwe, J L Bekker, P van der Merwe and A L Michel  
Emerging mycobacteria in South Africa — P D van Helden, S D C Parsons and N Gey van Pittius  

31. Book reviews
Atlas of small animal dermatology — H Schroeder  
SOS dog – The purebred dog hobby re-examined — Reviewed by Q Sonntag  
Onderstepoort 1908-2008 — Reviewed by B L Penzhorn  

32. Conference Abstracts
Parasitological Society of Southern Africa — 37th Annual Congress, 7–9 October 2008  
Parasitological Society of Southern Africa — 2007 Abstracts
Abstracts of papers and posters presented at the 36th Annual Congress of the Parasitological Society of Southern Africa (PARSA), 18–20 September 2007, Pestana Kruger Lodge, Malelane, South Africa

Keynote Addresses  
Understanding the role of gametocytes in the transmission of malaria and spread of antimalarial resistance  
Comparison of Babesia rossi and Babesia canis isolates with emphasis on effects of vaccination with soluble parasite antigens  
Genes and health: The role of immune gene variability (MHC) in parasite resistance in fragmented animal populations  

Oral Presentations  
Monogenea parasitising marine fishes in the Tsitsikamma National Park on the South Coast of South Africa  
Characterisation of South African Thelersonella equi and Babesia caballi isolates based on 18S rRNA gene sequences  
Malaria in the concrete jungle  
The use of multimedia in teaching veterinary helminthology  
Prevalence of blood parasites in lions in Southern Africa  
Mantoscyphidians (Ciliophora: Peritrichia) of gastropods in a marine environment  
The ultrastructure of a louse found parasitising the European bee-eater Merops apiaster  
Malaria Decision Support System Project  
Using GIS to understand malaria clusters
Taxonomic review of the genus Eupolystoma (Monogenea: Polystomatidae) ........................................... 117
Copper oxide wire particles in control of Haemonchus contortus in naturally infected sheep in Kenya ........... 118
The micromorphology of the cattle louse Haematopinus quadrigertusus .................................................. 118
A SEM study of the adult Varroa jacobsoni mite from honey bees ......................................................... 118
Trichodinid ectoparasites of Anuran larvae ................................................................................................. 118
The composition of the helminth fauna of helmeted guineafowls, Numida meleagris, from the Limpopo Province, South Africa ........................................................................................................... 119
Holy cows and sacred beetles – Sustainable parasite management on cattle farms ...................................... 119
Integrated control of ticks (Ixodidae) and tsetse flies (Glossinidae) in sub-Saharan Africa ....................... 119
An overview of the Oxpecker Translocation Project of the EWT Wildlife Conflict Prevention Group ........ 119
A monogenean parasitising Pseudocrenilabrus philerdr philerder collected from the Padda Dam ............. 119
Detection of a Theileria sp. isolated from dogs in South Africa ............................................................... 120
Patterns of ectoparasite aggregation in the 4-striped mouse, Rhadamys pumilio .................................... 120
Monogenean species of Quadriacanthus Paperna, 1961 (Monogenea) on the gills of the sharpnose and bluntnose catfish from the Okavango Delta, Botswana ................................................................. 120
Digenean parasites from Lymnaea natalensis sheddings from the Tshwane area ...................................... 120
Virulence in mice of Trypanosoma congolense stocks obtained from buffalo at Hluhluwe-Imfolozi game reserve in KwaZulu-Natal, South Africa ........................................................ 121
The animal health industry and our environmental responsibility ............................................................ 121
The isolation and characterisation of a Babesia bovis stock from outbreaks on a farm in KwaZulu-Natal, South Africa .......................................................... 121
Tick, fly, and mosquito control – lessons from the past, solutions for the future ........................................ 121
Pentastomid infection in fish intermediate hosts ......................................................................................... 121
A review of Myxobolus species (Myxosporea) on African Hydrocynus species ...................................... 122
An overview of the Endangered Wildlife Trust’s Wildlife Conflict Prevention Group ......................... 122
Poster Abstracts ......................................................................................................................................... 122
Efficacy of 3 anthelmintics in communally grazed sheep as reflected by faecal egg counts in a semi-arid area of South Africa ................................................................. 122
Theileria species infection in the Cape buffalo (Syncerus caffer) in 2 game parks in South Africa ........ 122
The evaluation of Avotan® Pour-on (0.5 % m/v abamectin formulation) against nematode and ixodid infestations in cattle ................................................................. 122
Southern African marine fish siphonostomatoids ....................................................................................... 123
Dynamics of host–parasite associations between dung beetles and the dog nematode Spirocerca lupi ........ 123
The micromorphology of the warthog flea Echidnophaga larina ............................................................ 123
Gyrodactylisis – a cause for concern? ......................................................................................................... 123
Skin and gill parasites of Oreochromis mossambicus and Tilapia sparrmanii ........................................... 124
Metazoan parasites and health of Clarias gariepinus from Nwanedi-Luphepe Dams – preliminary results 124
Diversity of myxosporidians from 2 fish species in the Okavango Delta, Botswana ............................... 124
Characterisation of South African Theileria parva isolates by PCR-RFLP analysis of the parasite antigen gene, polymorphic immunodominant molecule (PIM) ..................................................................................................... 124
The geographic distribution and a taxonomic description of ticks in the Free State Province .................. 125
Anthelmintic efficacy of copper oxide wire particles against artificial Haemonchus contortus infections in indigenous Zulu goats ................................................................................................. 125
Parasitological Society of Southern Africa – 2008 Abstracts
Abstracts of papers and posters presented at the 37th Annual Congress of the Parasitological Society of Southern Africa (PARSA), 7–9 October 2008, Faculty of Veterinary Science, University of Pretoria, Pretoria, South Africa

Keynote Addresses ........................................................................................................................................ 126
Climatic change over South Africa: Projections and perceptions ............................................................... 126
Is Plasmodium knowlesi the 5th human malaria parasite? ........................................................................ 126
Oral Presentations ....................................................................................................................................... 126
Development of a quantitative real-time PCR assay for the detection of Babesia caballi infections in equids 126
Identification of Theileria mutans genotypes from African buffalo using 18S rRNA gene sequence analysis 126
Abalone tubercle mycosis an emerging disease in the South African abalone industry .......................... 127
The velvet assasins – Amyloodinium ocellatum potential disease risk for captive marine fishes in South Africa ...................................................................................................................... 127
The ultrastructure and possible function of the spirode in ticks ................................................................ 127
Blood dietary factors that may influence the survival and production in tsetse flies colonies .................... 127
Metal accumulation analysis within tissue of Bothriocephalus acheilognathi ........................................... 127
Effect of deworming on EPI programmes ................................................................................................. 128
Parasites and diseases of amphibians: Should we be concerned about Madagascar? ............................ 128
Study of an ectoparasitic crustacean from Malaysia with light and electronmicroscopy ........................ 128
The functional microstructure of the cabbage aphid Brevicoryne brassicae (L.) .................................... 128
The biodiversity, systematics and ecology of fish parasitic gnathiid isopods from the East Coast of South Africa ................................................................................................................................. 129
Infections and mortalities induced by Metarhizium anisopliae in various developmental stages of the red-legged tick Rhipicephalus evertsi evertsi using 2 formulations ................................................................. 129
Comparative features of Argas walkae and Argas persicus using scanning electron- and light microscopy 129
An egg-laying rhythm in Diplectanum olivieri (Monogenea: Diplectanidae), a gill parasite of dusky kob (Argyrosomus japonicus) .......................................................... 129
Control of the major malaria vector Anopheles gambiae displaying resistance to multiple insecticides in Ghana .......................................................... 129
Is the Culicoides fauna changing? Port Elizabeth as a case study .......................................................... 130
Seasonal distribution of Culicoides spp. on 2 farms in the Western Cape Province .......................................................... 130
Epidemiology of animal trypanosomosis in northern KwaZulu-Natal 2005–2007 .......................................................... 130
Aspects of the ecology of Cichlidogyrus philander collected in the Padda Dam from Pseudoncrobilus philander philander .......................................................... 130
Infection of Anoplophora species with the rodent malaria parasite Plasmodium berghei .......................................................... 131
The 1st adult gryporhynchid cestode from freshwater fish .......................................................... 131
Molecular detection of trypanosomes infecting cattle, wild animals and tsetse flies in KwaZulu-Natal, South Africa .......................................................... 131
Risk analysis of potential transmission and implications of exotic Gyrodactylus spp. on cultured and wild cyprinids in the Western Cape .......................................................... 131
Implication of trypanosome strains diversity in the epidemiology of bovine trypanosomosis .......................................................... 132
Monogenean parasites of largemouth bass Micropterus salmoides (Lacepede, 1802) in Tzaneen Dam .......................................................... 132
Aspects of the biology and biogeography of chelonian polystomes .......................................................... 132
Vector competence of field and colony Glossina austeni and Glossina brevipalpis for trypanosome species in KwaZulu-Natal .......................................................... 133
Monitoring performance in South African parasitology proficiency testing programmes, 2003–2007 .......................................................... 133
Development of a TaqMan PCR for the detection of Theileria parva in South Africa .......................................................... 133
The anthelmintic efficacy of copper oxide wire particles (COWP) against Haemonchus contortus in communally grazed indigenous goats in KwaZulu-Natal, South Africa .......................................................... 133
Ticks of livestock in the North West Province of South Africa .......................................................... 134
The effect of starvation on the fish ectoparasite Dolops ranarum (Crustacea: Branchiura) .......................................................... 134
Software on-farm decision support systems required for sustainable anthelmintic efficacy .......................................................... 134
South African Hexabothridae: History, public aquarum importance, challenges, and the way forward .......................................................... 134
Comparison of 4 light traps for the collection of Culicoides species (Diptera, Ceratopogonidae) under South African conditions .......................................................... 135
Comparison of insecticide resistance in larval and adult life-stages between 3 strains of the malaria vector, Anopheles funestus .......................................................... 135
Poster Abstracts .......................................................... 135
Ecological parameters of an unidentified Diplozoon sp. on the bushveld smallscale yellowfish, Labeobarbus polyepis (Boulenger, 1907) .......................................................... 135
Preliminary studies on oviposition site preferences of Culicoides imicola (Diptera: Ceratopogonidae) .......................................................... 135
A novel Babesia sp. found in cheetahs (Actinonyx jubatus) in South Africa .......................................................... 135
The ultrastructure of the mange mite Psoroptes pienaari (Fain, 1970) occurring on the African buffalo Syncerus caffer .......................................................... 136
The relevance of Glossina austeni and Glossina brevipalpis (Diptera, Glossinidae) colonies for tsetse fly research and management in South Africa .......................................................... 136
The evaluation of the susceptibility of Trypanosoma congolense isolates collected from cattle and buffalo in KwaZulu-Natal to isometamidium chloride and diminazene aceturate .......................................................... 136
A novel Gnathia sp. (Crustacea: Isopoda: Gnathiidae) from Lizard Island, Great Barrier Reef, Australia .......................................................... 136
The micromorphology of the Menacanthus body lice collected from a prairie .......................................................... 137
Gertrud Theiler Tick Museum, Onderstepoort Veterinary Institute, South Africa .......................................................... 137
Spatial distribution of blackfly (Diptera: Simuliiidae) challenge for livestock farmers along the Vaal River, South Africa .......................................................... 137
Preliminary survey of the presence of intestinal Eimeria spp. in domestic bovines, ovines and caprines from selected sites in South Africa .......................................................... 137
A review of zoonotic importance of leishmaniasis: Significance of diagnosis in South Africa .......................................................... 138
The insect reference collection at the ARC-OVIs .......................................................... 138
Metazoan parasites of Mircaloes acutidens from the Limpopo River drainage system, South Africa .......................................................... 138
An endoparasitic monogenean from Oreoichromis mossambicus .......................................................... 138
Monogeneans of some fish species in the Luphephe-Nwanedi Dam, South Africa .......................................................... 139
The African clawed frog (Xenopus laevis): a haven for parasites .......................................................... 139
Development of a duplex real-time RT-PCR for detection and identification of BTV and AHV .......................................................... 139
Cichlidogyrus spp. Paperna, 1960 on the gills of Tilapia rendalli from the Okavango Delta, Botswana .......................................................... 139
Digenetic trematodes of marine fish in the Tsitsikamma National Park .......................................................... 139
An update of the bovine trypanosomosis situation at the edge of Hluhluwe-Imfolozi Park, KwaZulu-Natal Province, South Africa .......................................................... 140
Myxosporean parasites infecting Okavango catfishes .......................................................... 140
Identification of a small Babesia species found in a dog imported from Taiwan .......................................................... 140
Theileria-infected cell line from an African buffalo (Syncerus caffer) .......................................................... 140
