Index, Subject* — Indeks, Onderwerp

Volume 72 . Jaargang 72 — 2001
No. 1 — March  • Maart: 1–60
No. 2 — June  • Junie: 61–116
No. 3 — September: 117–180
No. 4 — December  • Desember: 181–251

Anaesthesiology
The use of haloperidol during the transport of adult ostriches .......................................................... 2
Anaesthesia of roan antelope (Hippotragus equinus) with a combination of A3080, medetomidine and ketamine .......................................................... 29
Some cardiopulmonary effects of midazolam premedication in denbuterol-treated bitches during surgical endoscopic examination of the uterus and ovariohysterectomy .......................................................... 33
The reversal of xylazine hydrochloride by yohimbine and 4-aminopyridine in goats .................................... 64
Anaesthesia of gemsbok (Oryx gazella) with a combination of A3080, medetomidine and ketamine ............... 81
Analgic and cardiopulmonary effects of intrathecally administered romifidine or romifidine and ketamine in goats (Capra hircus) .......................................................... 84
Changes in respiratory function following the intramuscular administration of etorphine to boer goats (Capra hircus) .......................................................................................................................... 137
Some clinical effects of midazolam premedication in propofol-induced and isoflurane-maintained anaesthesia in dogs during ovariohysterectomy ........................................................................ 214
Rectal prolapse associated with a healed pelvic fracture in a pregnant free-ranging African black rhinoceros (Diceros bicornis). Part 1: anaesthesia ............................................................................................................. 239

Anatomy
Radiographic anatomy of the thoraco-abdominal cavity of the ostrich (Struthio camelus) .......................................................... 203

Animal husbandry
Socioeconomic, health and management aspects of working donkeys in Moretele 1, North West Province, South Africa .......................................................................................................................... 37

Avian (poultry, ostriches, cage birds)
The use of haloperidol during the transport of adult ostriches .......... 2
Biochemical composition of urine from farmed ostriches (Struthio camelus) in Botswana .......................................................... 46
Factors related to high levels of ostrich chick mortality from hatching to 90 days of age in an intensive rearing system .......................................................... 197
Radiographic anatomy of the thoraco-abdominal cavity of the ostrich (Struthio camelus) .......................................................... 203

Bacterial, mycoplasmal and fungal diseases/bacteriology
Chlamydial abortion in goats in the Umzimkulu district of Eastern Cape .......................................................................................................................... 63
Isolation of Haemophilus somnus from dairy cattle in Kwazulu-Natal. An emerging cause of ‘dirty cow syndrome’ and infertility? .......................................................................................................................... 95
Prevalence of microorganisms associated with udder infections in dairy goats on small-scale farms in Kenya .......................................................................................................................... 97
Temporary remission of disseminated paecilomycosis in a German shepherd dog treated with ketoconazole .......................................................................................................................... 99
The first reported case of equine nocardioform placentitis in South Africa .......................................................................................................................... 235

Bovine
Devil’s claw (Harpagophytum procumbens) in a Brahman’s preputial sheath: a case report from Botswana .......................................................................................................................... 55
Lumpy skin disease in southern Africa: a review of the disease and aspects of control .......................................................................................................................... 68
Birth of live calves by in vitro embryo production of slaughtered cows in a commercial herd in South Africa .......................................................................................................................... 72
Effects of anionic salts in a pre-partum dairy ration on calcium metabolism .......................................................................................... 76
Isolation of Haemophilus somnus from dairy cattle in Kwazulu-Natal. An emerging cause of ‘dirty cow syndrome’ and infertility? .......................................................................................................................... 95
Use of ethnoveterinary medicinal plants in cattle by Setswana-speaking people in the Madikwe area of the North West Province of South Africa ........................................................................... 189
The resurgence of trypanosomosis in Botswana .......................................................................................................................... 232

Canine
Renal involvement in dogs with babesiosis .......................................................................................................................... 23
Some cardiopulmonary effects of midazolam premedication in denbuterol-treated bitches during surgical endoscopic examination of the uterus and ovariohysterectomy .......................................................................................................................... 33
Cervical teratoma in a dog .......................................................................................................................................................................................... 49
Immune-mediated haemolytic anaemia: possible association with Ancylostoma caninum infection in three dogs .......................................................................................................................... 52
Suspected post-vaccinal acute polyradiculoneuritis in a puppy .......................................................................................... 96
Temporary remission of disseminated paecilomycosis in a German shepherd dog treated with ketoconazole .......................................................................................... 99
First report of a parasitic mite, Leptotrombidium (Hypotrombidium) subquadratum (Lawrence) (Acari: Trombiculidae: Trombiculinae) from dogs and children in the Bloemfontein area, South Africa .......................................................................................................................... 105
Canine distemper infections, with special reference to South Africa, with a review of the literature .......................................................................................................................... 127
Systemic inflammatory response syndrome and multiple-organ damage/dysfunction in complicated canine babesiosis .......................................................................................................................... 158

*PARSA abstracts are indexed under Parasitology.

Veterinary needs of dogs in two resource-limited communities in Gauteng and North West provinces in South Africa .......................................................... 209
Some clinical effects of midazolam premedication in propofol-induced and isoflurane-maintained anaesthesia in dogs during ovariohysterectomy ........................................... 214

Caprine/ovine
Chlamydial abortion in goats in the Umzimkulu district of Eastern Cape ............................................... 63
The reversal of xylazine hydrochloride by yohimbine and 4-aminopyridine in goats ........................................... 64
Analgesic and cardiopulmonary effects of intrathecally administered romifidine or romifidine and ketamine in goats (Capra hircus) .......................................................... 84
Prevalence of microorganisms associated with udder infections in dairy goats on small-scale farms in Kenya ........ 97
Changes in respiratory function following the intramuscular administration of etorphine to boer goats (Capra hircus) .... 137
Influence of sheep breed and application site on the efficacy of a flumethrin pour-on formulation against ticks ........ 143
The role of parasitic diseases as causes of mortality in small ruminants in a high-potential farming area in central Kenya ...... 147
A case of caprine perineal squamous cell carcinoma in Botswana .......................................................... 165
Evaluation of a commercially available molybdate formulation and zinc oxide boluses in preventing hepatic copper accumulation and thus enzootic icterus in sheep .................................................. 183
Out-of-season breeding of milk goats - the effect of light treatment, melatonin and breed .............................................. 228

Clinical pathology
Use of the Accusport semi-automated analyser to determine blood lactate as an aid in the clinical assessment of horses with colic .......................................................... 12

Epidemiology
New distribution records of Amblyomma hebraeum in the sandveld regions of Botswana ........................................ 3
Amblyomma hebraeum is a vector of Rickettsia conorii .......................................................... 182
The resurgence of trypanosomosis in Botswana .......................................................... 232

Equine
Use of the Accusport semi-automated analyser to determine blood lactate as an aid in the clinical assessment of horses with colic .......................................................... 12
Socioeconomic, health and management aspects of working donkeys in Moretele 1, North West Province, South Africa .......... 37
Genetic variation in the feral horses of the Namib Desert, Namibia .......................................................... 16
Accidental monensin toxicosis in horses in Mozambique .......................................................... 163
The effect of frog pressure and downward vertical load on hoof wall weight-bearing and third phalanx displacement in the horse - an in vitro study .................................................. 217
The first reported case of equine nocardioform placentitis in South Africa .......................................................... 235

Feline
Feline babesiosis: signalment, clinical pathology and concurrent infections .................................................. 4
Delusions of parasitosis in clients presenting pets for veterinary care .......................................................... 167

Genetics
Genetic variation in the feral horses of the Namib Desert, Namibia .......................................................... 16

Medicine
Feline babesiosis: signalment, clinical pathology and concurrent infections .................................................. 4
Renal involvement in dogs with babesiosis .......................................................... 23
Immune-mediated haemolytic anaemia: possible association with Ancylostoma caninum infection in three dogs .......... 52
Suspected post-vaccinal acute polyradiculoneuropathy in a puppy .......................................................... 96
Temporary remission of disseminated pancytopenia in a German shepherd dog treated with ketoconazole .......... 99
Systemic inflammatory response syndrome and multiple-organ damage/dysfunction in complicated canine babesiosis .... 158

Nutrition
Effects of anionic salts in a pre-partum dairy ration on calcium metabolism .................................................. 76

Parasitology
New distribution records of Amblyomma hebraeum in the sandveld regions of Botswana ........................................ 3
In vivo evaluation of amitraz against ticks under field conditions in Ethiopia .................................................. 44
Immune-mediated haemolytic anaemia: possible association with Ancylostoma caninum infection in three dogs .......... 52
Prevalence of Culicoides imicola and other species (Diptera: Ceratopogonidae) at eight sites in Zimbabwe .......... 62
First report of a parasitic mite, Leptotrombidium (Hypotrombidium) subquadratum (Lawrence) (Acari: Trombiculidae: Trombiculinae) from dogs and children in the Bloemfontein area, South Africa .................................................. 105
Prevalence of intestinal parasites in children at 44 schools in the Boland/Overberg Health Region, Western Cape Province South Africa [Abstract] .................................................. 109
Unusual protozoans found in the oesophageal folds of the abalone Haliotis kamtschatkana kamtschatkana Jonas, 1845 [Abstract] .................................................. 109
The development of Haller’s organ in the East African tick Amblyomma gemma [Abstract] .................................................. 109
 Automated detection of malaria during full blood count analysis [Abstract] .................................................. 109
Application of a Parasite Index correlated with water quality on the Vaal River System [Abstract] .................................................. 109
Aspects of the life cycle of Lamproglena clariae (Crustacea: Copepoda) [Abstract] .................................................. 110

Malaria in South Africa and a developing regional approach to the problem [Abstract]. ......................................................... 176
Insecticide resistance in malaria vector mosquitoes and implications for malaria control [Abstract] .............................................. 176
Malaria prophylaxis in non-immune travellers - 2000 [Abstract]. ................................................................................................. 177
Management of malaria [Abstract]. .............................................................................................................................................. 177
Why ticks suck! Practical and physiological issues discussed [Abstract] .......................................................................................... 177
The helminth parasites of African freshwater fishes, challenges for 2000 and beyond [Abstract] ...................................................... 177
Juvenile hormone in ixodid ticks – real or desired perspective? [Abstract] ..................................................................................... 178
The epidemiology and control of sheep scab within the European Union [Abstract] ................................................................. 178
Current recommendations for acaricide use to control Boophilus microplus: where is the evidence? [Abstract] ...................... 178
Fish blood infections off the shelf? [Abstract] ........................................................................................................................................ 178
Worldwide distribution of the family Trichodiniidae (Peritrichia: Mobiliida) from fishes [Abstract] ................................................... 179
Evolution of cephalopod-parasitising Doridicola Leydig, 1853 (Copepoda) [Abstract] ................................................................. 179
Parasites as a biomonitoring tool for detection of habitat degradation [Abstract] ........................................................................ 179
Fish parasites of the Okavango River and Delta, Botswana [Abstract] ........................................................................................... 180
Amblyomma hebraeum is a vector of Rickettsia africae and not R. conori .................................................................................. 182

Pathology
Cervical teratoma in a dog ................................................................................................................................................. 49
A case of caprine perineal squamous cell carcinoma in Botswana ............................................................................................. 165
Rectal prolapse associated with a healed pelvic fracture in a pregnant free-ranging African black rhinoceros (Diceros bicornis). Part 2: surgery and necropsy .......................................................... 242

Pharmacology
In vivo evaluation of amitraz against ticks under field conditions in Ethiopia ........................................................................... 44
The use of analgesic drugs by South African veterinarians ........................................................................................................... 57
The reversal of xylazine hydrochloride by yohimbine and 4-aminopyridine in goats ....................................................................... 64
Suspected adverse reactions to veterinary drugs reported in South Africa (January 1998-February 2001) ....................................... 120
Influence of sheep breed and application site on the efficacy of a flumethrin pour-on formulation against ticks ...................... 143
Use of ethnoveterinary medicinal plants in cattle by Setswana-speaking people in the Madikwe area of the North West Province of South Africa ........................................................................................................ 189

Physiology
Biochemical composition of urine from farmed ostriches (Struthio camelus) in Botswana .............................................................. 46
Porcine
Suspected nitrite poisoning in pigs caused by Capsella bursa-pastoris (L.) Medik. (‘herderstasie’, shepherd’s purse) ....................... 170

Primary animal health care
Socioeconomic, health and management aspects of working donkeys in Moretele 1, North West Province, South Africa ............. 37
Use of ethnoveterinary medicinal plants in cattle by Setswana-speaking people in the Madikwe area of the North West Province of South Africa ........................................................................................................ 189
Veterinary needs of dogs in two resource-limited communities in Gauteng and North West provinces in South Africa ........... 209

Production
Factors related to high levels of ostrich chick mortality from hatching to 90 days of age in an intensive rearing system ............... 197

Protozoal diseases
Feline babesiosis: signalment, clinical pathology and concurrent infections .................................................................................. 4
Renal involvement in dogs with babesiosis ........................................................................................................................................ 23
Systemic inflammatory response syndrome and multiple-organ damage/dysfunction in complicated canine babesiosis ............ 158
The resurgence of trypanosomosis in Botswana .................................................................................................................................. 232

Radiology
Radiographic anatomy of the thoraco-abdominal cavity of the ostrich (Struthio camelus) ............................................................. 203

Reproduction
Devil’s claw (Harpagophytum procumbens) in a Brahman’s preputial sheath: a case report from Botswana .............................. 55
Chlamydia abortion in goats in the Umzimkulu district of Eastern Cape ....................................................................................... 63
Birth of live calves by in vitro embryo production of slaughtered cows in a commercial herd in South Africa ........................... 72
Isolation of Haemophilus somnus from dairy cattle in KwaZulu-Natal. An emerging cause of ‘dirty cow syndrome’ and infertility? ................................................................................................................................. 95
Out-of-season breeding of milk goats - the effect of light treatment, melatonin and breed ................................................................... 228

Rickettsial diseases
Amblyomma hebraeum is a vector of Rickettsia africae and not R. conori .................................................................................. 182

Surgery
Cervical teratoma in a dog ................................................................................................................................................. 49
Devil’s claw (Harpagophytum procumbens) in a Brahman’s preputial sheath: a case report from Botswana .............................. 55
Rectal prolapse associated with a healed pelvic fracture in a pregnant free-ranging African black rhinoceros (*Diceros bicornis*). Part 2: surgery and necropsy ................................................................. 242

**Toxicology**
Accidental monensin toxicosis in horses in Mozambique ................................................................. 163
Suspected nitrite poisoning in pigs caused by *Capsella bursa-pastoris* (L.) Medik. ('herderstassie', shepherd's purse) ........................................... 170
Evaluation of the efficacy of a molybdate formulation and zinc oxide boluses in preventing enzootic icterus ................................................................. 183

**Veterinary education and extension**
Student perceptions of problem topics/concepts in a traditional veterinary anatomy course ................................................................. 150

**Virology**
Lumpy skin disease in southern Africa: a review of the disease and aspects of control ................................................................. 68
Report of isolations of unusual lyssaviruses (rabies and Mokola virus) identified retrospectively from Zimbabwe ................................................................. 92
Canine distemper infections, with special reference to South Africa, with a review of the literature ................................................................. 127

**Wildlife/exotic animals**
Anaesthesia of roan antelope (*Hippotragus equinus*) with a combination of A3080, medetomidine and ketamine ................................................................. 29
Anaesthesia of gemsbok (*Oryx gazella*) with a combination of A3080, medetomidine and ketamine ................................................................. 81
Rectal prolapse associated with a healed pelvic fracture in a pregnant free-ranging African black rhinoceros (*Diceros bicornis*). Part 1: anaesthesia ................................................................. 239
Rectal prolapse associated with a healed pelvic fracture in a pregnant free-ranging African black rhinoceros (*Diceros bicornis*). Part 2: surgery and necropsy ................................................................. 242

**Zoonoses and human health**
Spinose ear tick, *Otobius megnini* (Dugès, 1884) as the cause of an incident of painful otitis externa in humans ................................................................. 118
Delusions of parasitosis in clients presenting pets for veterinary care ................................................................. 167

**Continuing education**
The use of analgesic drugs by South African veterinarians ................................................................. 57

**Special reports**
Suspected adverse reactions to veterinary drugs reported in South Africa (January 1998–February 2001) ................................................................. 120

**Review articles**
Canine distemper infections, with special reference to South Africa, with a review of the literature ................................................................. 127

**Abstracts**
Parasitological Society of Southern Africa – 28th Annual Scientific Meeting ................................................................. 131, 173

**Book reviews**
A guide to canine and feline orthopedic surgery (4th edn) ................................................................. 22
Comprehensive reports on technical items presented to the International Committee or to Regional Commissions [OIE] ................................................................. 43
Comprehensive reports on technical items presented to the International Committee or to Regional Commissions [OIE] ................................................................. 75
*Plantas tóxicas do Brasil* ................................................................. 107
OIE manual of standards for diagnostic tests and vaccines (4th edn) ................................................................. 157
Diagnostic manual for aquatic animal diseases ................................................................. 164
Ethnoveterinary medicine – an annotated bibliography of community animal healthcare ................................................................. 172
International animal health code: mammals, birds and bees, 10th edn ................................................................. 202
International aquatic animal health code ................................................................. 208
Tierzucht in den Tropen und Subtropen ................................................................. 213
